It is well known that our earth, taken as a whole, must be about five and a half times the weight of an equal bulk of water, yet if we estimate, as we can do, the weight of the we estimate, as we can do, the weight of the mountains, with their rocks and earth, we find them to be equal to but about two and six-tenths of their bulk in water. Some have attempted to explain this on the principle of magnetism, supposing the center to be most in ensely magnetic, and hence attracting all things to itself with double power. But others regard it as a proof that our earth is solid, not fluid at the center, and composed there chiefly of the denser metals.

Dr. J. Sterry Hunt, F. R. S., of Canada, has lately been presenting this view in one of his

Dr. J. Sterry Hunt, F. R. S., of Canada, has lately been presenting this view in one of his geological lectures—a view which, though contrary to the opinion entertained by Humboldt Agassiz, and most scientific men until quite recently, is entertained by Sir Charles Lyell and others. That our earth commenced to revolve while in a fluid state is held to be certain from its very shape; but it had been generally taken for granted, rather than proved, that congelation would commence at the surface. No doubt this is the case with water that congelation would commence at the surface. No doubt this is the case with water ing into ice, but this is owing to a well

entertained that this must be the case with our earth.

In favor of a liquid center it has been urged that as we descend into caves and mines we find the temperature increasing at a regular and perfectly calculable ratio, and which continuing, all known substanes would naturally be in a state of fusion at the depth to say from eighteen to twenty-five miles. And this must probably be the case practically, but for the effects of pressure, which is well known to be favorable to solidification. Where any body expands in fusion, this last effect is always at least retarded by pressure. We all know

A distinguished mathematician in England A distinguished mathematician in England, of the name of Hopkins, by a series of mathematical calculations, based on the precession of the equinoxes, has anounced the conclusion that the earth, if not solid throughout, must at least be so to the depth of eight hundred miles; while another series of calculations, based upon the effect of the moon on the tidal system of our globe, has been made to prove that the crus of the earth, if only a court is at least two thousand five hundred

seem to stand only at the entrance of wha may and will be known on all these subjects That there must be at least vast subterranea That there must be at least vast subterranean currents of liquid matter, melted with feverent heat, if the whole centre is not in a state of fusion, seems certain, from the vast extant of many of the phenomens connected with earthquakes and volcanic cruptions. But what is truth, and what mere conjecture, in matters dee beneath the inspected crust of the globe, who shall now tell?—Philadelphia Ledger.

English Interests in the South.

English capital and English commercial interests have already, since the war, secured the larger part of the carrying trade between our Southern States and European ports. The steamship lines running between New Orleans and the commercial centres of England and France, are by no means the only evidences of this, though they are the most noticeable. Within a few weeks past, the cotton exports (this year's crop) have been moving direct to Europe in unusual volume. The signs of the times are that this English activity in the South, after obtaining centrol of the foreign commerce of that section, will be turned toward the establishment and control of manufactures there. We have heard recently of not a few ventures of English capital in the direction of cotton and other manufactures. There are some attractions toward South Carolina; but Georgia and Alabama are also reported by the agents of English houses to reported by the agents of English houses to hold out especially inviting opportunities. That road is building connecting lines with the same object in view. The Martinsville and Shelbyville extension draws from Indianapolis a large business, which would naturally seek this market, if it had equal facilities for reaching here. The Indianapolis and Cincinnati is also building a road up the White Water valley to Conners ville, from thence probably a connecting link will be built to New Castle, to connect will the Cincinnati and Chicago Air Line Road at that point—all "to build up the city of Cincinnati." That is the policy of Mr. Lord; that is the policy of the Indianapolis and Cincinnati in Railroad, and to that end its wealth, its influence, and its management are directed. Is this policy just to Indiana? All the franchises, and all the privileges the road has obtained, except a few miles in Ohlo, were chises, and all the privileges the road has obnot be used to her disadvantage. It is the interest of the State to build up commercial centers within her own borders. The railroads which traverse the State can aid materially in that work. They give employment of that labor should be kept within the State nterests were concentrated. All of this has been transferred to Cincinnati, to the disadantage of Indianapolis. That much has been taken away from Indianapolis, to build up Cincinnati and benefit Ohio. Should the legstation of the State be made tributary to such an end? Probably no property in the State is so lightly taxed as the railroad interest. In the Past and Future of the Demo-cratic Party.

Healthy have been most generously desit with. But should this policy continue, when the roads are managed so as to contribute to the advancement of interests outside of the State, "to build up the city of Concinnati," or other cities beyond our borders?

The present wealth, prosperity and business of Indianapolis are mainly due to the railroads which concentrate here. They have imade our city one of the great, if not the greatest, railroad centers in the country. It should be the policy of our citizens to maintaif ther supremacy in that regard. We hardly a preciate the advantages of our position in that respect. Hardly a traveler passes through the city without leaving something, if it is only the price of a meal. And of course the larger the volume of travel is swelled, the greater than volume of travel is swelled, the greater than the properties and leasy planted them.

One is the Indiana and Illinois Central, running from Indianapolis to Decatur, Illinois, there intersecting the road to Hannibal, Missouri. This would make the shortest route from Philadelphia and Baltimore to the Great West and give us the benefit of the immense trade that would pass over it, besides the advantage of the local trade which the building of the road westward from here would develop. The Congressional Republican doctors diffe upon the policy of Congress. Some think, an so say, that Congress is pledged to the admi sion of Representatives from the excluded States upon their ratification of the amend ment, while others contend that no promise of that kind was given. Of course, if representation is conceded to them, they can not be denied their vote in the electoral college. The high priest of Republicanism, THAD. last, there was a tie vote in the choice of councilman for the Third Ward. The candidates were E. R. MERRITT, radical, and RICHARD S. BROWN, colored. A special election, to deede the contest, was held on Thursday last. It appears, from the following account of the election, that it was exciting and closely-contested throughout, but the white Republicans threw off their colored friend:

"At the opening of the polls the friends of Brown were in the majority, and they chose a negro for inspector. During the hours the polls were open the ward room was crowded, and each candidate had his friends at work. At one o'clock Brown was forty-nine votes, and the betting was almost even. Both parties thoroughly canvassed the precinct, and both work was so follows: Merritt, 467; Brown, 426, Merritt's plurality, 41. As it was, however, the radical caucus, and was afterward renominated the by the Democrats. The lesson to be derived from this election is that the colored voters of this city in future will vote in solid phalanx against all radical nominations. WASHINGTON, Saturday, December 15. The Senate Finance Committee have taken up the House tariff bill of last session. They agreed to consider the bill on the 20th, and continue its consideration during the recess

gether.

It is rumored that it is proposed to establish an official gazette, which will contain exclusively all Government announcements and advertisements; thus avoiding the present squab-

ble among the Washington papers in regard to official advertisements.

In the Supreme Court yesterday the following cases were taken up:

No. 6, original ex parte, A. H. Garland, of Arkansas, and No. 8, original ex parte, P. H. Mair, of Louisians; petition to be admitted to resume practice in the United States courts, without subscribing to the test oath. The motion of Mr. Sherwood to reopen the argument was overruled.

Meeting of Lutheran Synod. Reading of Lutheran Synod.

A special convention of delegates from the various orthodox Lutheran Synods of New York and Canada, which met here last Wednesday for the purpose of considering the proposition for the basis of a union between the Synods attached to this branch of the denomination, adjourned last night. They have provided for the organization of a lecal union, to meet here, to be called the Lutheran Council of North America. The representation of this body is based upon the number of communicant memberships represented in the convention.

They adopted the Augsbera Confession as its doctrinal basis.

In the course of the session they authorized the publication of new English and German hymn books for the use of the denomination. The utmost harmony characterized the proceedings throughout.

I have known Hoofland's German Bitters favorably for a number of years. I have used them in my own family, and have been so pleased with their effects, that I was induced to recommend them to many others, and know that they have operated in a strikingly beneficial manner. I take great pleasure in thus publicly proclaiming this fact, and calling the attention of those afflicted with the diseases for which they are recommended, to these Bitters, knowing from experience that my recommendation will be sustained. I do this more cheerfully as Hoofland's Bitters is intended to benefit the afflicted, and is "not a rum drink."

CONSUMPTION. (In its most advanced stages.)

For the raducal cure of Astima, Bronchitis, Catarrh, and all affections of the Lungs, Throat, and Air Passages; for General and Special Derangements of the Nervous System; for Disorders of the Blood; and for all Functional Disorders of the Stomach and Bowels.

It immediately increases the strength and deepens the color of the pale blood. It subdues the chills and Fever, and dimishes the Expectoration. It checks the night sweats, always, in from seven to fourteen days. The appetite is at once invigorated, and the patient rapidly gains flesh; the cough, and the dinacult breathing are speedly relieved; the sleep becomes calm and refreshing; the evacuations regular and uniform. All the general symptoms of Consumption, Asthma, Bronchitis, etc., disappear with a really astonish ing rapidity. Agents Wanted!

singular that the White Pine Compound, made for coughs and colds, should prove to be the greatest remeay for kidney complaints known. But so it is, We can not doubt it, so many testimonials come to us from well known men. Besides the character of Dr. Poland is such that we know that he will not countenance what is wrong. For years a Baptist Clergyman, studying medicine to find remedies for his ailments, with delicate consumptive look, standing with one foot upon the grave, he made the discovery which has saved misself, and called from others the strongestestimonials possible. We have known Dr. Poland for years, and never knew a mere conscientious, honest, upright man, and are glad to state that we believe whatever he says about his White Pine Compound.

SPECIAL NOTICES. Spread the Truth! Some medical men insist that it is undignified

o advertise a remedy, however valuable it may be. Queer reasoning this. It is like saying that an article which the world needs should be hid in a corner—that benefits and blessings may be too widely diffused-that the means of protecting and esto, ing health should be a close monopoly, and not accessible to all. The argument is bal. It is worse than that; it is inhuman. Suppose HOS-TE TER'S STOMACH BITTERS—an absolute easy terms, for the balance will buy that splendid Farm, three miles from the city, with a good new house, and all convenient outhouses, orchard, etc. Don't forget the auction sale to-day at two o'clock.

There is the highest authority for saying that light should not be hid under a bushel; that whatever is excellent should be placed as a city on a hill, where all men can take cognizance of it. It is upon this principle that the BITTERS have been ry's celebrated Moth and Freckle Lotion. It is Oh, that I had a Farm for a house, is the cry of many who suffer by the hard times and high prices in the city. At the auction sale to-day, by Seidensticker & Co., als in its favor have been translated into all written languages. Thousands enjoy perfect health to-day who would be languishing on beds of sick-ness if the newspapers had not spread the truth with regard to this unequaled invigorant and corrective far and wide. Suppose profit has been reaped from this publicity. Is that argument

against it? If the public health has been pro-tected; if lives have been saved; if the feeble have been strengthened and the sick restored, great good has been accomplished; and who se mean as to grudge to exertions thus directed the air reward? HYCIENIC WINE This IMPORTED Tonic, recommended by t most eminent physicians, is made of PURE SHERRY.

Admits in its composition only Tonic, Aromatic and Febrifuge substances. It replaces, with a great superiority, all other Bitters, which hav for a base nothing but alcohol or inferior whis kies. It is richer than any other Bitters in Aromatic and Balsamic Principles, And its taste is exquisite. Its soothing effects on the Nervous Fluids is most astonishing, for, while it gently exhilerates by reanimating the fund tions of the Digestive Organs, and dissipate Lan-guor, by gently refreshing and stimulating the Brain, giving a healthy tone to the whole organism, it leaves behind none of the baleful influences that follow alcoholic stimulants.
